Introduction

This guide provides basic instructions for navigating the City of Portland's Bureau of Environmental Services (BES) Environmental Data Portal at <https://aquarius.portlandoregon.gov/Data>. The Environmental Data Portal can also be accessed from the City of Portland web site at <https://www.portland.gov/bes/rainfall-data-portland>.

Dashboards

Two dashboards are located on the left column of the main page: *Welcome* and *Latest Rainfall*. Links are highlighted in blue text. The links in the left column provide access to the precipitation data plus stream conductivity and temperature data that are also stored within the BES Data Portal.

Environmental Data Portal

ENVIRONMENTAL SERVICES CITY OF PORTLAND

working for clean rivers

Welcome to the Environmental Data Portal

The Environmental Data Portal provides access to the rainfall and water quality time-series monitoring data collected by the Bureau of Environmental Services (BES). The portal does not present all available data held by BES.

The USGS Oregon Water Science Center hosted these data for over 25 years. In April 2025, USGS notified BES that they could no longer maintain the website into the future. On September 11, 2025, BES began hosting the data utilizing the Aquatic Informatics Aquarius Time-Series application.

To Access the Rainfall Data Select a Link Below:

- [Latest rainfall data table for all rain gauges](#)
- [Map of all active rain gauge locations](#)
- Daily Total Rainfall Reports for the previous 20 years: [North Portland](#), [Northeast Portland](#), [Northwest Portland](#), [Southeast Portland](#), [South Portland](#), [Southwest Portland](#), [Outside Portland](#)
- Please see the [Getting Started Guide for the Environmental Data Portal](#) for simple instructions.
- For more detailed instructions, please see the [Aquarius Web Portal User Guide](#).

City employees or partners that would like enhanced access to the portal should [e-mail us](#) and request an account. An account offers additional functionality and allows access to the portal REST API.

We welcome feedback from the data user community using the Environmental Data Portal [Feedback Form](#).

About the Data

Rainfall data is collected by BES from a network of gauges across Portland. These gauges measure precipitation in near real-time and provide critical data for:

- Monitoring stormwater flows and managing system capacity
- Guiding the maintenance and operations of our systems
- Informing long-term infrastructure investment and planning

Important Disclaimers

- **No liability:** Data is released on the condition that the City of Portland may not be held liable for any damages resulting from its use.
- **Operational use only:** This data is primarily intended for internal planning and analysis. While it may be helpful to the public, Environmental Services does not guarantee its accuracy or fitness for legal or engineering use.
- **Data gaps may occur:** Periodic gaps in data collection may happen due to maintenance, equipment failure, or connectivity issues.

Welcome Page

The Welcome Page has links to:

- The latest rainfall table for all rain gauges
- A map of all rain gauge locations
- Daily rainfall reports for the previous 20 years

To Access the Rainfall Data Select a Link Below:

- [Latest rainfall data table for all rain gauges](#)
- [Map of all active rain gauge locations](#)
- Daily Total Rainfall Reports for the previous 20 years: [North Portland](#), [Northeast Portland](#), [Northwest Portland](#), [Southeast Portland](#), [South Portland](#), [Southwest Portland](#), [Outside Portland](#)
- Please see the [Getting Started Guide for the Environmental Data Portal](#) for simple instructions.
- For more detailed instructions, please see the [Aquarius Web Portal User Guide](#).

Latest Rainfall Table

The Latest Rainfall table provides a list of active rain gauge stations, rainfall statistics and links to the hourly data table and charts.

- Click on the rain gauge name for location details.
- Right click on a column header for the time period you are interested in and select “open link in a new tab” for a map of rainfall values for that time period.
- Click on the table and graph icons for hourly data tables and charts.

Latest rainfall from BES rain gauges

- Select the rain gauge location name for location summary
- Click on the  for the USGS-style hourly data table
- Click on the  for six charts of results
- Right-click on column headers and select “open in a new tab” for a map of the rain gauges with the values for the selected time period

Rain Gauge Name	Totals (in)										Charts and Graphs
	6 hr	12 hr	24 hr	1 Day	3 Day	5 Day	7 Day	Mon...	Year	Water Year

Map of Total Rainfall Values

- From the page listing the rain gauges, right-click on the column headers and select “open link in a new tab” for a map of rainfall values.

Rain Gauge Name	Totals (in)										Links
	6 hr	12 hr	24 hr	1 Day	3 Day	5 Day	7 Day	Mon...	Year	Water Year	
Airport Way #2 Pump Station	0	0	0					0.39	19.39	38.82	 
Albina Pump Station	0	0	0					0.24	19.03	37.06	 
Portland Fire and Rescue Statio...	0	0	0					0.14	19.51	38.73	 
Arleta School	0	0	0					0.25	18.22	35.79	 
Astor School	0	0	0	0	0	0	0	0.29	17.45	36.57	 
Beaumont School	0	0	0	0	0	0	0.02	0.26	16.16	33.23	 
Bonny Slope BSD	0	0	0	0	0	0	0	0.44	17.16	34.90	 
Cascade PCC	0	0	0	0	0	0	0	0.37	18.15	36.86	 

Right-click on the column headers and select “open link in a new tab” for a map showing those values

- A map will display showing the rainfall total at each gauge location for that specific time period selected.

Hourly Data Table

- From the page listing all of the rain gauges, click on the table icon on the far right column for USGS-style hourly rainfall data for that specific rain gauge.
- The citywide average of all rain gauges is also calculated; see the first entry, shown below.

Latest rainfall from BES rain gauges

- Select the rain gauge location name for location summary
- Click on the  for the USGS-style hourly data table
- Click on the  for six charts of results
- Right-click on column headers and select "open in a new tab" for a map of the rain gauges with the values for the selected time period

Rainfall Summary Charts

- From the page listing the rain gauges, click on the graph icon to display six different graphs specific to that rain gauge:
 - Current Year vs. 20-Year Average
 - Hourly totals (last 7 days)
 - Daily totals (last 60 days)
 - Monthly totals (last 2 years)
 - Water year totals (October 1 – September 30)
 - Calendar year totals

Click on the graph icon for multiple graph options

- Within the graphs, you can zoom in on specific time periods by clicking on the zoom tool at the bottom of the chart along the x-axis.

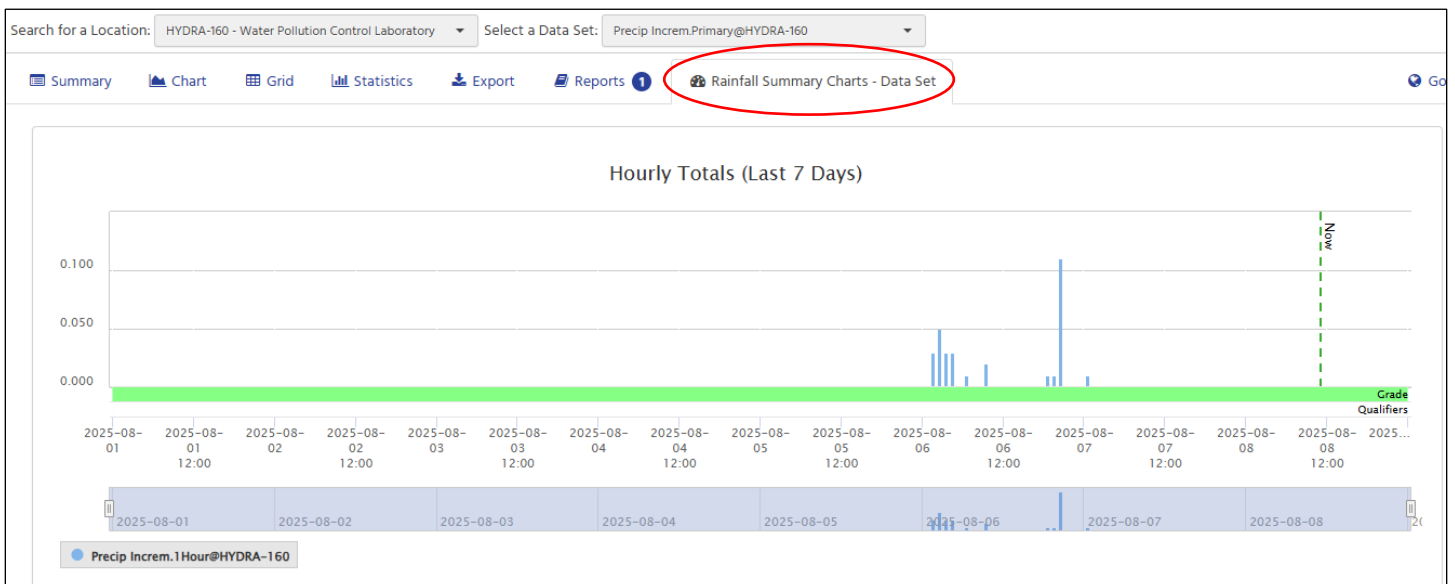

Map of rain gauge locations

- Below are instructions for another method to access rainfall data charts in addition to the one described above.
- Back at the *Welcome Page*, click on the link for the *Map of all active rain gauge locations*.
- Within the map, you can click on a specific rain gauge for more details. A window will appear with rainfall totals for that period.
- Click on *Data Set* to access charts for a specific time period.

- Click on the tab called *Rainfall Summary Charts – Data Set* to access charts for various time periods, including the water year totals.

Daily Total Rainfall Reports (for the last 20 years)

To view a spreadsheet of daily rainfall for all of the gauges within a specific region of the city, ex: North Portland:

- Go to the *Welcome Page*
- Click on the link for a region of the city for *Daily Total Rainfall Reports for the previous 20 years: North Portland, Northeast Portland, Northwest Portland, Southeast Portland, South Portland, Southwest Portland, Outside Portland*.

To Access the Rainfall Data Select a Link Below:

- [Latest rainfall data table for all rain gauges](#)
- [Map of all active rain gauge locations](#)
- [Daily Total Rainfall Reports for the previous 20 years: North Portland, Northeast Portland, Northwest Portland, Southeast Portland, South Portland, Southwest Portland, Outside Portland](#)
- Please see the [Getting Started Guide for the BES Data Portal](#) for simple instructions.
- For more detailed instructions, please see the [Aquarius Web Portal User Guide](#).

- Open or save the downloaded .csv file (shown below).
